

AMMUNITION SHIPPING AND STORAGE
CONTAINER AND METHOD

5 ABSTRACT OF THE DISCLOSURE

10 A container system and method for shipping and
 storing an item is provided. The container system may
 comprise a storage vessel with an interior compartment,
 and an access opening at one end. A removable end cap
 may be releasably and mechanically coupled to the storage
 vessel at the access opening, fully enclosing the access
 opening. Mechanical fasteners may also be secured to the
 storage vessel and removable end cap to form the
15 releasable, mechanical connection. In one embodiment, at
 least one stacking lug may be provided at the perimeter
 of the storage vessel. In another embodiment, the
 container may comprise a pressure vessel, which may be
 adapted to receive a round of ammunition
